

Strategies for difficult to reach ileal pouch anal anastomosis

Khaled Madbouly, MD, PhD, FRCS, FACS, FASCRS, MBA
Professor of Colon and Rectal Surgery
University of Alexandria- Egypt

University of Alexandria

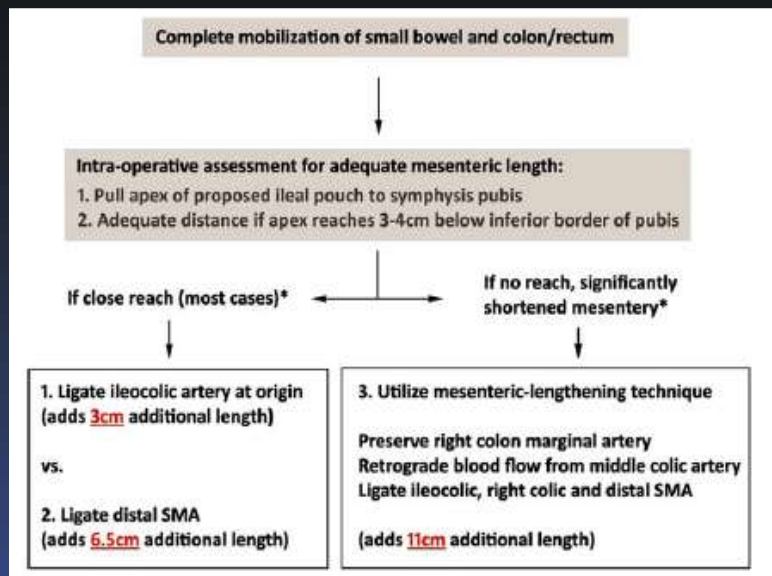

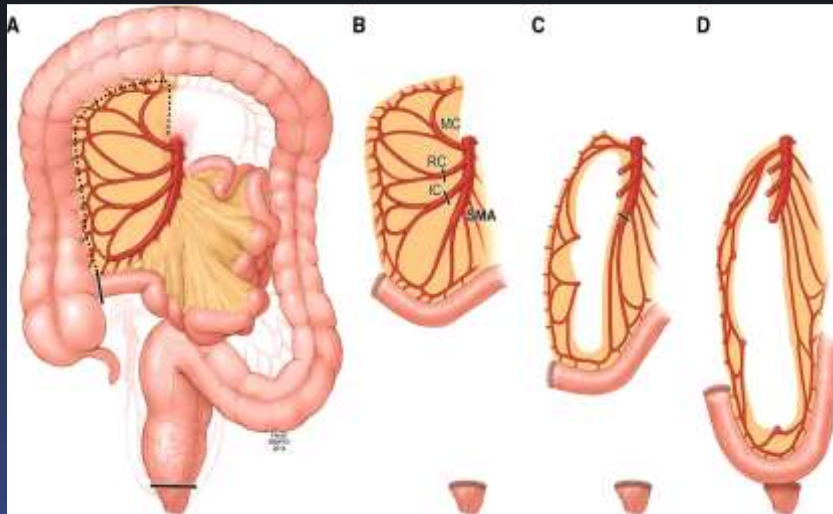

Options

- ▶ A series of peritoneal incisions over terminal ileal mesentery
- ▶ Mobilization of the root of mesentery beyond the fourth part duodenum
- ▶ Ileocolic artery ligation gives a length of ≥ 5 cm
- ▶ Ligation of distal SMA adds 6 cm
- ▶ S pouch adds 2-4 cm length

University of Alexandria

Thank you
